

Use of modelling for development of management strategies in control of eutrophication for lake system of Mogan and Eymir

Bayar, A., Soyupak, S., Altinbilek, D., Mukhallalati, L., Kutoglu, Y., Gökçay Celal Ferdi

Department of Environmental Engineering, Article (1997)

Two natural lakes named Eymir and Mogan are experiencing with eutrophication problem. Rehabilitation alternatives for the lake system have been studied in detail; suitable management and pollution prevention plans were established using an integrated system analysis and modelling approach. The effectiveness of different management scenarios have been evaluated.

Anahtar Kelimeler: Management strategies, Eutrophication, Modelling
